About the Course

This professional preparation programme is designed for candidates sitting the MRCGP International AKT examination. Delivered over six months, the course provides structured, high-yield teaching aligned with the AKT blueprint, with emphasis on commonly tested clinical areas, examination technique and recurring themes from past questions.

Course at a Glance

Duration	6 months
Class Schedule	Every Thursday at 9.00 p.m.
Course Fee	LKR 35,000
Format	Online, interactive and question-based

Why Join This Programme?

- Structured coverage of the MRCGP International AKT blueprint
- Teaching led by an experienced MRCGP International examiner
- Focused revision of high-yield and commonly tested topics
- Practice with SBA and MCQ-style questions
- Guidance on examination strategy, timing and clinical reasoning

Curriculum Highlights

- **Clinical medicine:** cardiovascular, respiratory, gastrointestinal, neurological, renal, endocrine and musculoskeletal medicine
- **Primary-care specialties:** dermatology, ENT, ophthalmology, women's health, men's health, sexual health, child health and elderly care
- **Population and preventive care:** infectious diseases, cancer, palliative care, emergency presentations, health promotion and prevention
- **Professional practice:** prescribing safety, ethics, evidence-based practice, data interpretation, practice management and organisation of primary care

Teaching Format

- High-yield clinical topic reviews
- Past-question-based discussions
- SBA and MCQ practice sessions
- Guideline-focused learning
- Exam technique and time-management support
- Revision sessions and mock-style assessments

What Candidates Can Expect

By the end of the programme, candidates should have completed broad blueprint-based revision, strengthened their clinical knowledge, improved question-answering confidence and developed a more strategic approach to the MRCGP International AKT examination.
